

County Administrator and Town Board would like more fact finding.

How much money will be received and how is that calculated?

Are there limits on how that money can be used?

Will these totals be included in the JDA?

Up to 100 MW. Will this project consistently produce over 100 MW?

Is there a customer for this project?

How likely could a data center be put in?

Who is responsible for recycling the panels?

Emergency plan for Well Water testing and correction should an event happen.

If the project changes hands to new ownership will payment agreements change?

If the project is denied, can they apply again?

Has there been a study around Coopman's Creek? The water shed leads to Oconto Bay.

Add to JDA that roads are maintained throughout construction and replaced completely after completion of the project.

Noise upon construction- is a concern of neighbors.

Berms and foliage around project.

Invite other towns when the haul route is discussed.

Protocols for Lithium-Ion Batteries- Should there be standards for safety protocols
