Approval Requirements Only
After Town Board approval, Town Supervisors shall issue Driveway Permit and
Culvert (considering width only) Permit.

New driveway's and/or culverts must comply with Ordinance Number 02-08-08-2016; revised 07/13/2026

1) Driveway

- Landowner shall be responsible for construction of driveway, meeting Town requirements, and clean-up of debris after construction.
- Residential driveway shall be a minimum 20ft. wide driving surface with a height clearing 15ft. to accommodate emergency or other authorized vehicles (no obstructing brush or tree branches).
- Ag. and commercial driveways shall be a minimum 35 ft wide driving surface.

2) Culvert

- Landowner shall be responsible for cost, meeting Town requirements, and clean-up of debris on public roads.
- Two or more members of Town Board shall determine size of all residential, ag, or commercial culverts, on a case by case basis.
- Residential culvert shall be a minimum of 30 ft. long and 15-inches in diameter with end walls added to the 30 ft.
- Ag and commercial culverts shall be a minimum of 40 ft. long and 15-inches in diameter with end walls added to the 40 ft.
- New, and of steel or plastic only (no other type of material allowed).
- Covered with pit run, or $\frac{3}{4}$ up to $1\frac{1}{4}$ aggregate/gravel
 - Six-inch finish cover coat with $\frac{3}{4}$ or $1\frac{1}{4}$ aggregate/gravel
